CAMELLIA SASANQUA

# Fellow Tradesmen . . .

We are looking toward a new season, both in anticipation of what it may bring and in gratitude for the beneficence of the year just behind us. There are some things we would have changed if we could—the weather for instance—but everything considered, we believe our performance was satisfactory.

Of course, we are planning big things for the future, all of them designed ultimately for the benefit of our customers, refinements in growing procedures, savings in operating costs by mechanization of all possible work. Root pruning, too, will be studied and practiced as rapidly as feasible, for some items.

We are optimistic about the future, and we believe that there is lots of good business ahead for all of us in nursery work. The outstanding accomplishments of the AAN and of our own rapidly growing state FNGA are beginning to show tangible results for all accredited members of the Trade.

Again and always, we urge you to visit us as often as possible. It is still our contention that direct person-to-person dealings are by far the best way to buy.

Our warmest thanks to all of you who have helped to make 1955-56 one of our *good* years.

## Glen Saint Mary Nurseries Company

Dependable Since 1882

George L. Taber, Jr., *President*

## CAMELLIAS

The popularity of Camellias is not a new thing but has grown steadily through the years, commensurate with variety improvement and the impetus of commercial Camellia culture.

This is as it should be, for Camellias are among the finest of evergreen shrubs for planting almost anywhere in the South.

Sasanqua Camellias, in particular, are now enjoying a belated surge of consumer interest. This recognition of Sasanqua species is largely due to their amazing adaptability over wide and sometimes diverse growing areas. Hardiness and early blooming are also excellent reasons for their increasing favor.

We maintain that Sasanquas can do much, with adequate and sustained backing, to further the position of Camellias wherever they may be grown—to Memphis, Tenn. and Charlotte, N. C.—and even farther north along the Atlantic seaboard.

### Class A

GS. refers to French importations from Guichard Sisters, Nantes, France.

To avoid confusion, the letters A through H are used following each variety as a guide to sizes available in that particular Camellia.

**Alba Plena.** Full double, very regularly shaped, wax-like pure white. Early. A, B, C, D, E.

**Fred Sander.** Flower deep red, occasionally spotted with white. Quite unusual and very desirable. C, D.

**Gigantea.** (GS.) Large, peony form, deep red, splotched white. Spreading plant with enormous leaves. A, B, C, D, E.

**Lady Clare (Empress).** Large, semi-double, rose-pink flowers of crepe-like texture; prominent stamens. Hardy; vigorous. A, B, C, D, E, F.

**Mathotiana.** Very large, full rose form, deep rose-red, outer edges turning purple with age. A, B, C, D, E, F, G, H.

**Mathotiana Rosea.** (GS.) Very large, rose shape, rose-pink. B, C, D, E, F, G, H.

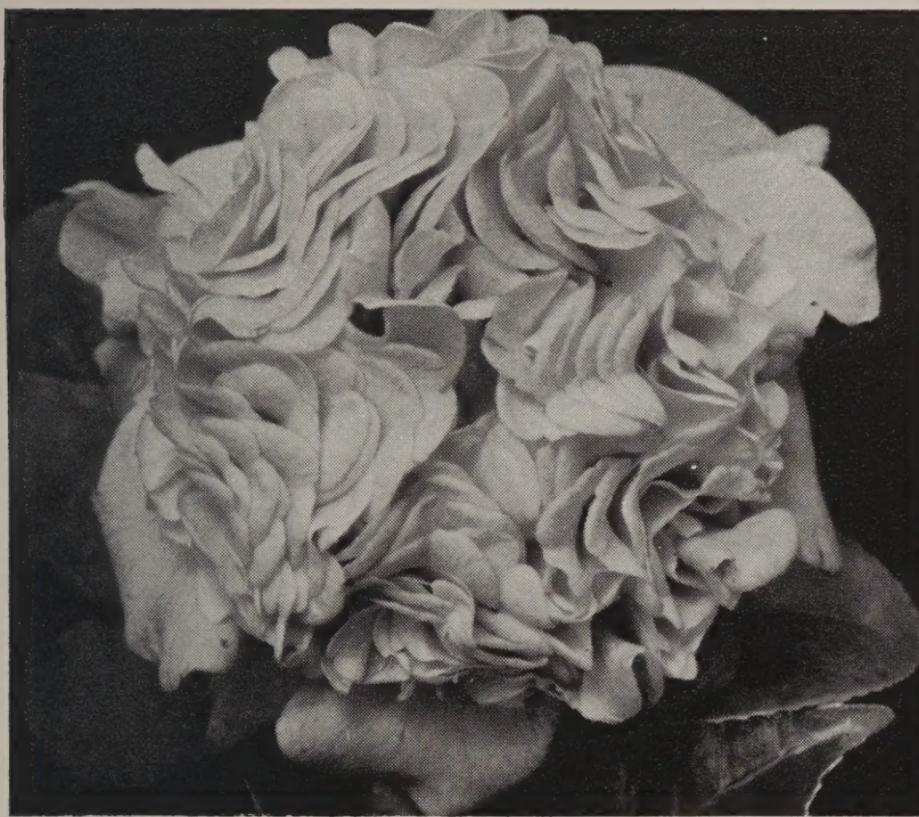

**Wm. S. Hastie (Col. Firey).** Formal, dark red flowers, true double, rather flat. Hardy. Excellent. A, B, C, D, E.

B&B, Branched	10
(A) 8 to 12 in.	\$12 50
(B) 12 to 18 in.	17 50
(C) 18 to 24 in.	25 00
(D) 2 to 3 ft.	35 00
(E) 3 to 4 ft.	57 50
(F) 4 to 5 ft.	80 00
(G) 5 to 6 ft.	100 00
(H) 6 to 8 ft.	130 00

### Class B

**Elegans (Chandler).** Very large, incomplete double, cherry-red to rose-pink, splotched with white. A, B, C.

**E. L. Steele.** Brought to our attention by the late E. L. Steele, a past president of our Company. Pure white, about 3 to 4 inches in diameter. The flowers are high-centered, of incomplete double form, with yellow stamens interspersed. Usually at its best in January and is remarkable for its prolific blooms borne on a strong bush. Foliage of good size, fine dark green. One of the best whites we know and not so temperamental as many others. A, B, C, D.

### CAMELLIA, PROF. C. S. SARGENT

#### CAMELLIAS, CLASS B, continued

**Gloire de Nantes.** Large, semi-double, very deep rose; long yellow stamens. A, B, C, D, E, H.

**Herme.** Large, peony form, white with red and pink stripes and splotches. A, B, C, D, E, G.

**Prince Eugene Napoleon.** Double, medium size, scarlet. A, B, C, D, E, G.

**Prof. C. S. Sargent.** Very double, peony form, varying from clear crimson to light red. C, D, E, F, H.

**Victor Emmanuel.** This Camellia is outstanding because of its great beauty of form and its brilliant coloring. The flowers are peony form and of a deep rich red. Its petals are raised and slightly fluted, and the stamens are in one large central cluster. The plant is compact, with deep green foliage, and blooms from midseason to late. A, B, C, D, E.

B&B, Branched	10
(A) 8 to 12 in.	\$7 50
(B) 12 to 18 in.	11 00
(C) 18 to 24 in.	20 00

(G) 5 to 6 ft.	85 00
(H) 6 to 8 ft.	120 00

### Class C

**Angela Cocchi.** (GS.) Variegated, sparsely marked with carmine stripes on flesh-pink, almost white ground. The blooms are medium size. D, E.

**Celtic Rosea.** Formerly Semi-Double Blush. Propagated from a French import. Semi-double, with petals of the palest blush-pink. Long yellow stamens. Very dainty and beautiful. A, B, C.

**Jarvis Red.** Semi-double, blood-red, with yellow stamens. A, B, C, D, E.

**Kellingtonia.** (GS.) Large, peony type, rich pink, lighter in center. A, B, C, D, E, F.

**Takayama.** Flowers tend to be small; self carmine shading lighter toward center. Of regular imbricated form. The blooms are borne profusely and the whole effect is most pleasing. D, E.

B&B, Branched	10
(A) 8 to 12 in.	\$6 50
(B) 12 to 18 in.	9 50

(E) 3 to 4 ft.	32 50
(F) 4 to 5 ft.	47 50

### Sasanqua Camellias

**Tanya.** Notable for its small, delicately sweet-scented, single blooms of rose-bengal hue. Flowers average 5 or 6 petals and shade to deeper pink along outer margins. Foliage small, narrow and sharp pointed.

B&B, Branched	10
12 to 18 in.	\$12 50
18 to 24 in.	17 50
2 to 3 ft.	22 50

**Blanchette.** A single white flower, tinted pink on margins, reminding one of dogwood. Very sturdy and upright, with dainty gray-green foliage. C, D, E, F.

**Briar Rose.** Soft clear pink, resembling the wild rose. Small, dark green foliage and a flaring habit of growth. C, D, E.

**Mine-no-yuki.** Semi-double; pure white with golden stamens. B, C, D.

B&B, Branched	10
(B) 12 to 18 in.	\$9 00
(C) 18 to 24 in.	12 50
(D) 2 to 3 ft.	17 50
(E) 3 to 4 ft.	22 50
(F) 4 to 5 ft.	30 00

## AZALEAS

### AZALEA INDICA

The Indian Azaleas are evergreen shrubs with large, single, or double flowers that sometimes measure 4 inches across. Some are slow-growing, practically dwarf, while others grow rapidly into large shrubs. Colors are varied and very beautiful.

#### Red

**Southern Charm.** A sport of Formosa in clear rose-red. The flowers are large and blooming time is about the same as its parent; midseason. Strong grower with good dark green foliage.

#### Orange

**President Clay.** Early. Tall, open growth; free flowering. Medium-sized blooms.

#### Salmon

**Lawsal.** Midseason. Hardy, rather bushy. One of the best.

#### Variegated

**George Lindley Taber.** Our own origination, named for our founder. Soft lavender-pink, faintly streaked darker pink and mottled cerise. Slightly fragrant. A rapid grower, resistant to cold. Usually blooms here in March.

#### Lavender

**Formosa.** Midseason. Very large flowers of lavender-lilac. Hardy, easy to grow.

## SHRUBS AND HEDGE PLANTS

### ABELIA, EDWARD GOUCHER (Pink Abelia)

One of the most useful shrubs, for it can be confined to any desired size and can grow in almost any location. The shiny, deep green leaves are tinted with an amber hue. The dainty, clear pink flowers are produced all summer. Evergreen in warmer areas.

Gal. cans, 12 to 18 in. . . . .	10
Gal. cans, 18 to 24 in. . . . .	\$8 50

### ABELIA GRANDIFLORA

One of our very best evergreen shrubs for foundation plantings, corner groups, single specimens, or ornamental hedges. The small leaves are bright glossy green, turning to a beautiful bronze in winter. Its flowers come in early May and the plant is covered with bloom until late autumn.

Bushy trimmed.

**CARISSA GRANDIFLORA** (Natal Plum)

Tall-growing evergreen shrub with fragrant white flowers about 2 inches across. The scarlet fruit is edible.

	10
Qt. cans	\$4 50
Gal. cans	8 50

**CASSIA BICAPSULARIS**

Showy legume bearing bright yellow bloom profusely in late summer and fall. Grows to 10 feet; evergreen in temperate climates.

	10
Gal. cans, 18 to 24 in.	\$6 50
Gal. cans, 2 to 3 ft.	9 00

**CESTRUM NOCTURNUM** (Night-blooming Jessamine)

A shrub 6 to 9 feet high, adapted to south Florida. The branches are curved and willowy, producing creamy yellow blooms that are fragrant at night.

	10
Gal. cans	\$7 50

**CLEYERA JAPONICA**

A fine evergreen shrub with rather thick, glossy leaves and creamy white, fragrant flowers. Berries red in early fall. An upright grower, reaching a height of 10 to 12 feet. Will withstand wet or dry situations with equal ease and seems to have few insect or disease enemies. We recommend it highly for trial as far north as Atlanta inland or Wilmington, North Carolina, on the coast.

**GARDENIA RADICANS**

A dwarf grower to 18 inches, having miniature white flowers with typical fragrance; trailing habit.

Gal. cans, 8 to 12 in. . . . . 10 \$5 00

**HIBISCUS**

In order that we may conform to the present trend, our Hibiscus for this season are cutting-grown so that, regardless of cold weather, the variety "carries on."

**Assorted Varieties.**

Cutting Grown	10
Qt. cans . . . . .	\$3 50
Gal. cans . . . . .	7 50

**HIBISCUS MUTABILIS (Cotton-Rose; Confederate Rose)**

Tree-like tall shrub; flowers opening white or pink, changing to deep red by night. Especially prized in southern gardens.

Gal. cans . . . . . 10 \$10 00  
10-in. cans . . . . . 20 00

**HYDRANGEA HORTENSIS**

Ornamental deciduous shrubs adapted to shady and half-shady locations. The white varieties bloom true to color; the others may be pink or blue, depending upon soil and culture. Pink blooms may usually be turned blue by the use of extra acid in the soil and blue varieties changed to pink by sweetening the soil with lime. Valuable as pot-plants indoors or used outside as flowering shrubs. The different varieties cover a long blooming season.

**Engel's White.** Midseason. Strong grower. White.

**Europa.** Early. Salmon-pink.

**Gertrude Glahn.** Midseason. Dark rose.

**Hamburg.** Early. Carmine.

**Strafford.** Midseason. Dark pink.

Gal. cans . . . . . 10 \$12 00

**HYDRANGEAS, MIXED**

For those who are not particular about varieties, we offer some good unnamed ones at a nice saving.

Gal. cans . . . . . 10 \$8 50

### ILEX CORNUTA BURFORDI

#### ILEX CORNUTA (Chinese Holly)

A dwarf, compact Oriental variety with exceptionally dark, shiny foliage, usually four spines besides tip. Berries red, large and showy.

#### ILEX CORNUTA BURFORDI (Chinese Holly)

Foliage is a beautiful dark green and very glossy. The leaves are oblong and usually smooth except for a sharp tip.

#### LANTANA SELLOWIANA (*delicatissima*)

Beautiful flowering shrubs adapted to Florida. Lilac flowers, freely produced, and dark green foliage. Of trailing habit and a rapid grower. Fine for window-boxes, baskets, and as a ground-cover.

Qt. cans	10
Gal. cans	\$3 50

Gal. cans 6 00

#### LIGUSTRUM ERECTA

New compact and semi-upright variety, having the appearance of a Nobile-Iwata hybrid. While apparently not as hardy as Lucidum, this fine variety has much to recommend it.

#### LIGUSTRUM EXCELSUM SUPERBUM

A very showy sort with brightly variegated green and white leaves. A rapid grower, good for screens and windbreaks.

#### LIGUSTRUM IWATA

An intermediate grower with small, slightly mottled foliage. Ideal for low foundation plantings and hedges.

#### LIGUSTRUM LUCIDUM (Wax-leaf Privet)

Very bushy, with rich dark waxy leaves and panicles of white flowers followed by large bunches of black berries. For foundation plantings, hedges and specimens.

Our Ligustrums are grafted on root-knot resistant Quihoui stocks, except where otherwise noted.

Natural Growth, bushy.

**LIGUSTRUM, SUWANNEE RIVER. Plant Patent No. 1402.**

We are growers of Suwannee River *Ligustrum* on Quihoui root. Suwannee River is a new dwarf patented Privet, introduced by Wight Nurseries in fall, 1954. This brand-new variety is slow enough in growth to be planted around a modern ranch-type home, and yet grows fast enough that it can sell at a reasonable price.

Suwannee River is a hybrid, the parents being *Ligustrum lucidum* (Wax-leaf Privet) and *Ligustrum coriaceum*. The foliage is a deep lustrous green, smaller than Wax *Ligustrum*, and slightly twisted. The nodes are close together, so that the foliage almost completely hides the woody stems. It appears to be immune from attacks of white fly and other insects. It should be an excellent addition to the broad-leaved evergreens for the Southeast, the Southwest, and the Pacific Coast. It is also being tested in other regions to determine its hardiness.

We hope to have a good supply of Suwannee River for fall and winter sales, in 12 to 18 in. and 18 to 24 in. grades, and shall welcome your inquiries concerning this interesting introduction.

**PHOTINIA GLABRA**

**PHOTINIA GLABRA**

A very handsome, hardy, evergreen shrub which will grow to a height of approximately 15 feet. The new foliage is wine colored and most attractive. The white flowers are carried in clusters and are followed by round red fruits. Prefers a sunny location in well-drained soil.

**PHOTINIA SERRULATA**

This variety grows to a much greater height than Glabra and is a beautiful sight in summer with its dark green, serrated leaves and large clusters of white flowers. In winter it is covered with scarlet fruit.

**CERCIS CANADENSIS (American Redbud)**

The American Redbud or Judas Tree is a small, nicely shaped, deciduous tree with rounded leaves and produces an abundance of rosy pink flowers in early spring. As the blooms appear before the foliage, a Redbud in full flower is a lovely picture.

**CERCIS CHINENSIS (Chinese Redbud)**

An Asiatic Redbud with purplish pink flowers. Individual blooms, often measuring  $\frac{3}{4}$  inch in length, are borne in heavy clusters along the branches. Ultimate height is said to be around 50 feet and the rate of growth is somewhat faster than that of Canadensis. The foliage and general appearance of the tree is very similar to that popular and well-known type.

Bare-Root	10
2 to 3 ft. ....	\$10 00
3 to 4 ft. ....	15 00
4 to 6 ft. ....	22 50
6 to 8 ft. ....	35 00

**CERCIS CANADENSIS ALBA (White Judas Tree)**

One of the most unusual spring-flowering trees to be found anywhere is the white variety of Redbud (*Cercis canadensis alba*). Bloom is pea-like, pure white and is usually produced in early spring before the leaves appear.

Although in many respects the tree is similar to the usual type, Alba foliage is much lighter green upon the upper surface than that of Canadensis. Its broad, flat head of thornless, angular branchlets is distinctive wherever seen.

Unquestionably, Alba is rare and deserving of an important position in the American horticultural picture.

2 to 3 ft.	12 50

**CORNUS FLORIDA (Dogwood)**

**HOLLIES**

Our Hollies are grafted from the finest selected strains of fruiting trees and should not be compared with seedlings. Choose any one of the types offered below, or better still, order the whole collection and you will never again be satisfied with ordinary Hollies.

**Croonenberg.** A Greenbrier origination. Upright, rather compact grower with fine dark green foliage of larger than average size and spiny leaves. Berries are a good red and are produced when the trees are still very young.

**Ft. McCoy.** Narrow, very spiny leaves on slender branches distinguish this variety. Berries abundant. May be readily trimmed.

**Howard.** The most popular variety we grow. Foliage very dark and glossy, with some spines; berries red and attractive. Excellent.

**Male.** Occasionally a Male Holly (staminate) is necessary, and we grow a limited number of them each year. Ask for special quotation on these.

**Prices—All preceding Hollies except Male.**

**MAGNOLIA GRANDIFLORA**

**MAGNOLIA GRANDIFLORA**

The great Bull Bay is the South's finest native evergreen tree; forest specimens often reach a height of 80 feet. The trees are roughly pyramidal in form with heavy leaves 5 to 8 inches long, glossy dark green above, and covered with soft brown felt beneath. The picture made by one of these magnificent trees in the sunlight is one any home-owner may justly be proud of. The flowers, which are produced over a period of two to three months in summer, are great waxy, creamy white saucers, 7 to 8 inches across, each bloom with a mass of yellow stamens and giving out a delightful fragrance. Its flowers are followed by large pods covered with brilliant red seeds.

Years ago we found that there was a great variation in seedlings, so we selected the most perfect types and grafted from them. In this way we have built up a strain, which we have named Saint Mary, superior to the wild trees and, we believe, to any stock in commerce anywhere. Our trees are uniform in size, shape, foliage and flowers, making them especially desirable for street planting.

**QUERCUS AQUATICA (Water Oak)**

A tall and fast-growing Oak, to 80 feet. Nearly evergreen in our climate. Bluish green leaves about 3 inches long.

**QUERCUS PRINUS (Michauxi) (Basket Oak)**

Often attains 100 feet. Leaves deciduous, to 7 inches long, coarsely toothed, shiny bright green above and grayish pubescent beneath. The acorns are over an inch in length. A relatively fast grower.

**QUERCUS VIRGINIANA (Live Oak)**

Famous both as landmarks of southern history and for their majestic beauty. The longest-lived and slowest-growing of the two varieties, this evergreen tree reaches 60 feet in height and spread. The shining dark green leaves are elliptic to oblong.

## CONIFEROUS EVERGREENS

This season finds us with some of the best Junipers that we have had in some time. We invite inquiry, particularly on larger materials for housing projects, industrial landscaping and similar jobs requiring minimum prices and maximum immediate showing.

### BIOTA AUREA CONSPICUA (*Thuja orientalis*)

Deep yellow to golden color, often varying to green. Tall, compact and upright.

B&B	10
12 to 18 in.	\$7 50
18 to 24 in.	10 00
2 to 3 ft.	17 50
Gal. cans, 12 to 18 in.	10 00

### BIOTA AUREA NANA (*Thuja orientalis*)

Compact, rounded head and handsome greenish golden foliage.

Gal. cans, 12 to 18 in.	10
Gal. cans, 12 to 18 in.	\$10 00

### BIOTA PYRAMIDALIS (*Thuja orientalis*)

A compact pyramidal Arborvitæ reaching a height of about 15 feet. Bright green, and holds its color well.

B&B	10	100
12 to 18 in.	\$7 50	\$60 00
18 to 24 in.	10 00	80 00
2 to 3 ft.	15 00	135 00
3 to 4 ft.	22 50	200 00
4 to 5 ft.	32 50	
5 to 6 ft.	50 00	

### CEDRUS DEODARA (Indian Cedar)

Of pyramidal form, reaching large size. Foliage a beautiful shade of bluish green; open and graceful in habit. Somewhat resembles Colorado Blue Spruce.

B&B	10
18 to 24 in.	\$17 50
2 to 3 ft.	27 50
3 to 4 ft.	40 00
4 to 5 ft.	55 00
5 to 6 ft.	75 00

### CEPHALOTAXUS HARRINGTONIA

A dwarf evergreen for use in rock-gardens, pools and in shaded borders. Its spiny leaves are about 1 inch long and cluster around the stems.

Gal. cans, 8 to 12 in.	10
Gal. cans, 12 to 18 in.	15 00

### JUNIPERUS CHINENSIS PFITZERIANA

(Pfitzer's Juniper)

Forms a low, flat, wide-spreading head of bluish green foliage. Very interesting and beautiful; highly resistant to drought.

B&B	10	100
12 to 18-in. spread	\$12 50	
18 to 24-in. spread	17 50	
2 to 3-ft. spread	25 00	
3 to 4-ft. spread	35 00	\$300 00
4 to 5-ft. spread	50 00	400 00

### JUNIPERUS COMMUNIS DEPRESSA PLUMOSA

(Andorra Juniper)

A dwarf variety also known as *J. horizontalis plumosa*. Spring foliage is silvery green, turning to a silvery purple or pinkish shade in the fall. It does not grow as close to the ground as some of the creeping forms, but lifts its branches 15 to 18 inches. Good for foundation plantings, for terraces and for rock-gardens. It thrives best in an open, sunny, well-drained location.

B&B	10
12 to 18 in.	\$12 50
18 to 24 in.	17 50

This may save you a trip: Don't take a chance, but contact us before coming or sending for a load (particularly in winter months) unless your order has previously been received and acknowledged.

### **JUNIPERUS JAPONICA SYLVESTRIS**

#### **JUNIPERUS CONFERTA (Shore Juniper)**

Spreading, prostrate Juniper with light green foliage, rather feathery; will not turn brown in winter. Will do well on sandy soil or clay.

Gal. cans, 12 to 18-in. spread.....<sup>10</sup> \$7 50

#### **JUNIPERUS EXCELSA STRICTA (Greek Juniper)**

A dwarf, narrow, compact, upright Juniper that does well under widely different conditions. Pleasing grayish green color. Fine for foundation work.

B&B	10
12 to 18 in.	\$12 50
18 to 24 in.	17 50
2 to 3 ft.	25 00
3 to 4 ft.	35 00

#### **JUNIPERUS JAPONICA SYLVESTRIS (Japanese Juniper)**

Grows well in the Lower South. The needle-shaped leaves are steel color and the smaller, scale-like ones are dark green. Narrow and upright in habit.

##### **Natural Growth**

B&B	10	100
18 to 24 in.	\$10 00	
2 to 3 ft.	15 00	
3 to 4 ft.	20 00

PALM, COCOS AUSTRALIS

## PALMS AND CYCADS

### COCOS AUSTRALIS

A beautiful Palm, of vigorous growth, with grayish green, curved leaves. A very hardy sort, and one of the finest Palms for the Gulf Coast country.

B&B	10
18 to 24 in.	\$17 50
2 to 3 ft.	25 00
3 to 4 ft.	37 50
4 to 5 ft.	60 00
5 to 6 ft.	90 00
6 to 8 ft.	147 50
8 to 10 ft.	250 00

### CYCAS REVOLUTA (Sago Palm)

A Palm-like cycad reaching a height of 3 to 4 feet, with handsome deep green leaves. Will stand some frost. 10  
Gal. cans, 12 to 18 in. \$15 00

### SABAL PALM

The beautiful native Palm of the South, commonly called "Cabbage Palmetto." It has a large head of fan-shaped leaves crowning a straight trunk 20 to 40 feet tall. Good for seaside planting, for it does not object to salt water. Should be more widely used. One of the hardiest Palms.

B&B	10
2 to 3 ft.	\$20 00
3 to 4 ft.	27 00
4 to 5 ft.	40 00
5 to 6 ft.	70 00

10 to 12 ft.	355 00

Wire Balled	Each
6 to 8 ft.	\$18 50
8 to 10 ft.	27 00
10 to 12 ft.	45 00

### WASHINGTONIA ROBUSTA

A splendid Palm with dark green, fan-shaped leaves; hardy, well adapted to Florida and the country bordering on the Gulf of Mexico. One of the finest for landscape plantings. 10  
10-in. cans, 18 to 24 in. \$30 00

**BOUGAINVILLEA, GLABRA SANDERIANA**

## VINES

**BIGNONIA CHERERE** (Scarlet Trumpet-Vine)

Strong-growing evergreen. Blooms yellow-orange, in clusters. Ideal for fences where a quick cover is desired. Stands sub-freezing cold.

Gal. cans ..... 10  
\$7 50

**BIGNONIA CHAMBERLAYNI**

Evergreen. Bright yellow flowers in early spring.

**BIGNONIA VENUSTA** (Flame Vine)

Evergreen. Profusion of bright reddish orange flowers. Tender.

Qt. cans ..... 10  
Gal. cans ..... \$3 50  
6 50

**BOUGAINVILLEA, AFTERGLOW**

Yellow-orange, changing to salmon and light rose. A most attractive variation.

**BOUGAINVILLEA, BARBARA KARST**

Vigorous new hybrid, much the same color as Crimson Lake but branches more readily and has larger flower bracts. Blooms along the entire branch. Makes a perfect bush without staking.

**BOUGAINVILLEA, CRIMSON LAKE**

A most strikingly beautiful variety with masses of bright crimson bloom. Somewhat tender.

Gal. cans ..... 10  
\$7 50

**BOUGAINVILLEA, GLABRA SANDERIANA**

Evergreen. Vigorous grower; large masses of purple flowers.

Gal. cans ..... 10  
\$6 50

**BOUGAINVILLEA, PANAMA PINK**

Light pink blooms; foliage is lighter green than Crimson Lake. Semi-climbing.

Gal. cans ..... 10  
\$7 50

**FICUS REPENS** (Evergreen Climbing Fig)

For covering buildings and walls.

2½-in. pots ..... 10  
\$2 00

Qt. cans ..... 3 50

**LONICERA JAPONICA HALLIANA**

**HEDERA HELIX (English Ivy)**

Dark green, leathery leaves. Particularly useful in partial shade as vine and ground cover. 10

Gal. cans ..... \$6 00

**HEDERA (IVY), Self-Branching Small-Leaf Type**

A fine new variety with unusually small, delicately formed leaves. Exceptionally good for use indoors. 10

2-in. pots ..... \$2 00

Gal. cans ..... 6 00

**JASMINUM ILICIFOLIUM**

A rapid-growing evergreen vine with handsome foliage and star-shaped, white flowers. 10

Gal. cans ..... \$6 00

**JASMINUM SIMPLICIFOLIUM (Wax Jasmine)**

Evergreen. Beautiful dark green, waxy leaves and white, star-shaped flowers. Can be pruned and grown as a shrub. Makes a splendid hedge. 10

Gal. cans ..... \$6 00

**LONICERA JAPONICA HALLIANA (Hall's Honeysuckle)**

A vigorous vine with fragrant white and yellow flowers in late spring and summer. Excellent for ground-cover and erosion prevention work. 10

Qt. cans ..... \$2 50

Gal. cans ..... 4 50

**RHYNCHOSPERMUM JASMINOIDES** (Confederate Jasmine)

Evergreen. Dark shiny leaves and fragrant, star-shaped, white flowers. Hardy. 10 100  
 Qt. cans. .... \$4 50 \$40 00

**WISTERIA, PURPLE**

Strong, hardy, deciduous vine. Flowers in large clusters in spring.

**WISTERIA, WHITE**

Produces large clusters of delicately scented, white flowers.

Bare-Root 10  
 Field-grown, medium ..... \$5 50  
 Field-grown, strong ..... 7 50

**BAMBOOS****ARUNDINARIA JAPONICA** (*Pseudosasa japonica*)

Hardest Bamboo, quickly growing 15 feet high. Large, handsome foliage. Spreads rapidly.

**BAMBUSA MULTIPLEX** (*B. argentea*)

Vigorous grower for hedges and screens. Handsome foliage and canes which will grow 25 feet.

**BAMBUSA MULTIPLEX, SILVERSTRIPE** (*B. argentea striata*)

A similar variety with green canes, striped with yellow near the base. The leaves are also variegated with whitish stripes.

**BAMBUSA MULTIPLEX, ALPHONSE KARR** (*B. verticillata*)

Upright clump Bamboo, with yellow and green striped canes about 30 feet high.

Prices—All above Bamboos 10 100  
 6 to 12 canes ..... \$7 50 \$70 00  
 12 to 18 canes ..... 9 50 85 00  
 20 to 30 canes ..... 25 50 230 00

**PHYLLOSTACHYS AUREA** (Golden Bamboo)

Rapidly spreading, very hardy Bamboo, with bright yellow canes. Very graceful. Good for fishing poles. 10

Single bibs ..... \$2 00

By all means try Photinia in your area—reasonably priced, yet definitely worthwhile. See page 16.

**BAMBOOS**

A SOUTHERN LAWN

## LAWN AND OTHER GRASSES

<b>CORTADERIA ARGENTEA (Pampas Grass)</b>	10	100
Small clumps.....	\$9 00	\$85 00
Medium clumps.....	12 00	110 00
Strong clumps.....	15 00	140 00
Extra strong clumps.....	\$2.50 each and up	

### EREMOCHLOA OPHIUROIDES (Centipede Grass)

Centipede is one of the best lawn and pasture grasses for the South. Spreads by surface runners and is excellent for sunny lawns, both dry and moist soils. Centipede does not thrive under alkaline or excessive lime conditions and should not be fertilized at excessive rates. High fertilization causes heavy mat of grass with roots out of the soil and makes it susceptible to drought and disease. Close mowing at less than 2 inches is recommended. Will set about 1200 square feet per bushel when set 1 foot apart each way.

Bu. ....	\$1 65
10 bu. ....	14 50

### STENOTAPHRUM (St. Augustine Bitter Blue Stem Grass)

Bitter Blue St. Augustine is one of our better lawn grasses, if not the best, for certain locations. Shaded lawns, coastal lawns, or those subject to salt sprays, moist to wet soils, and those too alkaline for Centipede, will support good Bitter Blue. Responds best to mowing at about 2 inches. Too close cutting of this grass is harmful.

A much-improved type, stronger growing, tougher, and extremely resistant to chinch-bugs. Throughout the year it seems to keep its color better than most southern grasses, will stand more dry weather, and is equally at home in sun or shade. One bushel will plant about 900 square feet of lawn if the grass is set a foot apart each way, or 450 square feet if spaced 1 foot by 6 inches.

Bu. ....	\$1 85
10 bu. ....	16 00

This may save you a trip: Don't take a chance, but contact us before coming or sending for a load (particularly in winter months) unless your order has previously been received and acknowledged.

#### ARECA LUTESCENS PALM

### HOUSE PLANTS

#### ARECA (*Chrysalidocarpus*) LUTESCENS PALM

A fine house Palm, with graceful, arching, dark green leaves and yellow stems.

18 to 24 in., 6-in. pots.....	\$25 00
3 to 4 ft., 8-in. pots .....	50 00

#### ASPIDISTRA LURIDA

Most satisfactory for house conditions. Large, dark green leaves.

Per leaf.....	\$0 05
---------------	--------

#### BEGONIA, SCANDINAVIAN

Beautiful masses of pink bloom with attractive yellow stamens characterize these lovely Christmas-flowering plants.

4-in. pots.....	\$7 50
5-in. pots.....	12 50

#### BEGONIA

**BEGONIAS, TUBEROUS-ROOTED**

Notable for their lush foliage and wide variety of brilliant colors. Blooms are often camellia-like and of almost perfect symmetry; sometimes single or semi-double. Colors range from white through brilliant yellow and orange to flaming red. Please order by color or in assortment.

5-in. pots..... \$10 00

**GLOXINIA**

A close relative of *Saintpaulia* but with much larger leaves. The velvety texture and brilliant tones of the bell-like flowers make them a favorite indoors during spring and early summer.

4-in. pots..... \$7 50  
5-in. pots..... 10 00

**KALANCHOE, TOM THUMB**

Succulent tropical herb with opposite, fleshy leaves, obovate oblong to 2 inches long; slightly toothed. Flowers bright orange, in flat-topped clusters. Usually blooms during Christmas season here.

2½-in. pots..... \$2 50  
3-in. pots..... 4 00

10 100  
\$20 00  
35 00

**PANDANUS VEITCHI**

One of the finest decorative plants, with sword-like, sharp-pointed, green foliage striped with creamy white.

Gal. cans..... \$20 00

**POINSETTIAS**

Among the most colorful subjects for use as Christmas decorations.

**Mrs. Paul Ecke and Oak Leaf (red)**

4-in. pots, two to three blooms..... 50c per bloom  
5-in. pans, average three blooms..... 50c per bloom

**SAINTPAULIA (African Violet)**

Blue Frills, Blue Girl, Dark Azure Beauty, Double Neptune, Double Rose, DuPont Blue, Fairy Tale, General Ike, Guam, Lady Geneva, Mulberry Girl, Purple Prince, Redlands, Sailor's Delight.

2½-in. pots..... \$2 50

Try Glen Air-Dried Peat in our 20-yard loads; it's tops of its type.

POINSETTIA

## HEMEROCALLIS (Daylilies)

Modern Daylilies are excellent for Florida gardens. Their brilliant colors, fragrance, extreme hardiness and long blooming period make them prime favorites. They grow in sun or part shade in practically any soil. Plant them in the perennial border or among shrubs or foundation plantings. Don't overlook Hemerocallis.

NOTE: The varieties marked with an asterisk (\*) are deciduous.

### CLASS A

**Bagdad.\*** Combination of orange, coppery red and brown.  
Long blooming period.

**Cressida.\*** Reddish orange with fulvous band. Midseason.

**E. A. Bowles.** Narrow, pointed, wide-part petals of pale gold, shading to reddish orange. Early.

**Hyperion.\*** Large, fragrant flowers of a pale luminous canary-yellow. Midseason.

**J. A. Crawford.** Very tall. Handsome, wide-open flowers of a clear shade of light yellow, deepening in the throat. A strong grower with a long blooming period.

**Linda.\*** The fluted golden petals are flecked with cinnamon; sepals creamy yellow. Midseason.

**Mikado.** Golden yellow flower with mahogany-red eye zone. Midseason.

**Ophir.\*** Golden yellow, trumpet shaped. Long season.

**Soudan.** The flower, of a rich glistening yellow, is of the full, recurved lily type, with broad, fluted and overlapping petals. A fine summer bloomer.

**Welaka.** Blooms very freely borne in May, of good substance and distinctly crepe-like and rippled in texture. Broad, spatulate petals with mandarin-orange throat which fades to the attractive rosy fulvous tone of the outer segments.

		10
Small clumps, 4 to 5-in. diam.		\$3 50
Medium clumps, 5 to 7-in. diam.		4 50

### Class B

**Aurantiaca.** Reddish orange.

**Cinnabar.** Rosy brown; yellow throat.

**Citrina.** Light lemon.

**Kwanso.** Double; orange-copper.

**Margaret Perry.** Rosy buff, yellow throat.

**Mrs. John J. Tigert.** Brazil-red.

**Orangeman.** Deep orange.

**Pale Moon.** Pale lemon.

**Vesta.** Orange-yellow.

	10	100
Small clumps, 4 to 5-in. diam.	\$2 00	\$15 00
Medium clumps, 5 to 7-in. diam.	3 00	25 00

### HEMEROCALLIS

## FRUIT AND NUT TREES

There is a place for both tropical and other fruit trees in every southern garden. Those sections adapted to growing citrus fruits can, of course, cater to a tremendous commercial market. For large growers such an orchard represents an important investment and brings large returns. Smaller growers and home gardeners as well will find that even a modest number of fruit and nut trees are well worth while.

### ORANGES (Field-grown on C. T. Stock)

Glen Improved Navel, Hamlin, Lue Gim Gong, Parson Brown, Pineapple, Thompson Navel, Valencia.

### GRAPEFRUIT (Field-grown on C. T. Stock)

Duncan, Foster Pink, Glenred, Thompson Pink.

### GLENRED GRAPEFRUIT

An outstanding seedless variety. The fruit resembles Thompson Pink except that flesh of Glenred is a dark rich pink. A faint blush of this color is noticeable through the rind. In habit of growth and time of maturity, Glenred approximates Marsh Seedless. Fruit is somewhat larger and "commercially" seedless.

### LEMON, Harvey and Meyer.

### SATSUMA ORANGE Owari, Kawano Wase, and Silverhill.

The Satsuma Orange, in the opinion of many, is the most profitable fruit that can be grown north of the round Orange territory. From Savannah, Georgia, along the Atlantic Seaboard, south to Jacksonville, Florida, and in the extreme southern portions of Louisiana and Mississippi, it is a good money crop. Our trees on Citrus Trifoliata, grown with the greatest of care, will make paying groves, and the easy-peeling fruit of these fine "Kid Glove" Oranges are a welcome addition to the home orchard.

**DOORYARD PLANTINGS—AN  
IMPORTANT NEW USE FOR  
CITRUS!**

While the idea has been used spasmodically for years, its application to the landscaping of present-day homes as an entirely feasible and desirable adjunct is now becoming more fully realized.

"Dooryard citrus" trees may be used as a source of fruit, for ornamentation, or for a combination of the two. Since citrus trees are very ornamental when properly handled, the planting can be made to blend with the overall design and also produce an abundance of good fruit. With an adequate plan and proper selection of varieties, it is possible to have healthful citrus fruit during most of the year.

The intelligent use of "dooryard citrus" landscaping can and should be undertaken wholeheartedly by nurserymen and landscape designers working in citrus areas everywhere.

Acknowledgment is hereby made to Messrs. Granger and Camp for material taken from their Florida Agricultural Extension Service Bulletin No. 140, "Dooryard Citrus Plantings in Florida."

**CITRUS FOR SOUTH AND CENTRAL FLORIDA**

Our extensive Citrus Nursery near Winter Haven, Polk County, in the heart of Florida's grove belt, specializes in Oranges, Grapefruit, Lemons, Limes and other adapted citrus trees that can be best grown on Sour Orange and Rough Lemon stocks. We suggest you write Glen Saint Mary Nurseries Company, Winter Haven, Florida, for wholesale and dealer arrangements in regard to this class of stock, suitable for Central and South Florida planting, and similar latitudes.

GRAPES

**BANANAS, Cavendish, Hart, and Orinoco**

2-yr.....	5 00	45 00
3-yr.....	7 50	65 00

**NEW MUSCADINE HYBRID GRAPES**

**Creek.** Very thin skin; large clusters of medium size. Juicy, reddish purple fruit; prolific. Ripens uniformly about October 1.

**Hunt.** Ripening in August, this variety is a regular bearer of large black bunches that hang on well; skin medium to thin. Excellent in flavor. A fine all-purpose Grape and probably the best of black varieties.

**Top Sail.** White fruit. Very vigorous but should not be pruned heavily for best yield.

Bare-Root	10
1-yr.....	\$7 50

**GUAVA****Red Cattley and Yellow Cattley**

Gal. cans.....	10
Gal. cans.....	\$10 00

### LOQUAT

#### LOQUAT (*Eriobotrya japonica*)

A handsome, large-leaved, medium-sized tree standing several degrees of frost, and a fine ornamental. The yellow, oblong fruit is about as large as a medium-sized plum and has a fine subacid flavor. Tree blooms in November to December, and fruits mature in spring.

5 to 7 ft. . . . .	15 00	

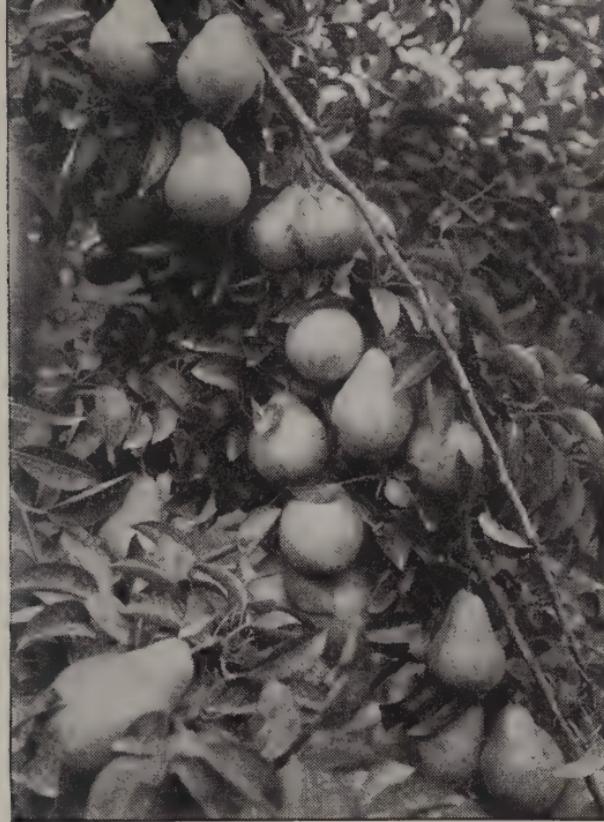

#### PEACHES ON PLUM ROOT

For a good many years we have been grafting our Peaches on Marianna Plum root because of its resistance to nematode (root-knot). Unfortunately, root-knot is apt to be a problem in Florida and the South as a whole, more or less serious in different locations and soils. Although we have long known that Peach on Plum root was not the ideal solution to the problem, nothing we have ever tried was as good. Peach on Plums is not a long-lived tree generally, although some are known to have survived a good many years in bearing condition.

Even with certain known shortcomings, Peaches on Plum root continue in considerable demand, and while we make no unprovable claims for them, we can say that without Peaches on Plum a good bit of the deep South would have gone peachless, as far as home and orchard production is concerned.

##### Angel, Babcock, Dorothy N., Elberta, Hall's Yellow, Jewel, Luttichau, Taber and Waldo.

4 to 5 ft.	18 50	
5 to 6 ft.	23 50	
6 to 8 ft.	28 50	

#### PLUMS

## GLEN AIR-DRIED PEAT

We are fortunate in having one of the finest deposits of pure Sedge Peat in this part of the country. Analysis as determined by commercial chemists, Thornton & Co., of Tampa, Florida, is as follows:

Available Phosphoric Acid . . . . .	0.04%
Insoluble Phosphoric Acid . . . . .	0.03%
Total Phosphoric Acid . . . . .	0.07%
Nitrogen . . . . .	1.05%
Equivalent to Ammonia . . . . .	1.28%
pH Value . . . . . (Neutral is 7)	

A report from the U. S. D. A., Bureau of Plant Industry, Washington, D. C., to whom we sent samples of Glen Peat, reads in part: "The material is exceptionally uniform in texture, composition and reaction. It consists of fibrous material derived from rootlets and underground stems of sedges and several grasslike plants. Plant remains from Sawgrass are not abundant, however, and organic material from Sphagnum mosses is not present. The reaction is acid pH 4.5 to 5.0."

Moisture retention ratio, 4.26 to 1. This means that Glen Peat will hold, when fully saturated with water, more than four times its own dry weight.

Normal moisture content of air-dried Glen Peat runs from 20 to 30%, and is therefore ideal for plant packing and most other horticultural uses. It may be stored in the open without fear of deterioration. For this reason, Glen Peat can be purchased in car or truck lots for use as needed.

### WHAT TO DO WITH IT

Use it for lawns, both old and new—incorporated in the soil when building new lawns, or as top dressing at least once a year on established grass.

Use it to build up humus content of light soils and to improve their moisture-holding capacity.

Use it as a mulch wherever one is indicated, but particularly for acid-loving plants such as AZALEAS, CAMELLIAS, MOUNTAIN LAUREL, GARDENIAS, HOLLY, MAGNOLIA, TEA PLANTS, NANDINA and others.

Use it thoroughly mixed with the soil in planting AZALEAS and CAMELLIAS; its acid reaction will help keep these plants in the best possible condition.

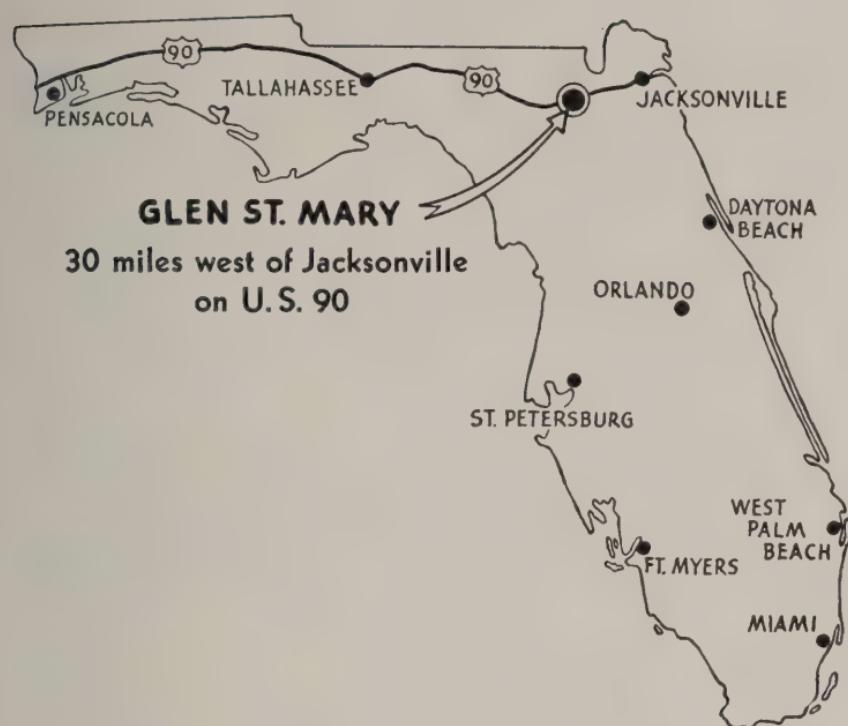

### GLEN AIR-DRIED PEAT PRICES

\$3.50 per yard shredded and delivered in city limits of Jacksonville in truckload lots (approximately 20 yds. to load) for \$70.00.

Our truck charge on full loads of bulk Peat will be 40c per road mile, outside of a radius of 55 road miles from the Mine at Florahome. There is no delivery charge for the first 55 road miles, but from there on to destination will be figured at 40c per mile *one way only*.

**Freight rates on Peat Humus, carload lots, minimum 60,000 pounds, from Florahome, Florida, to the following points:**

	Per ton of 2000 lbs.
Macon, Georgia . . . . .	\$7 54

## CONDITIONS OF SALE

**PRICES:** Prices herein are for the Wholesale Trade only and cancel all previous Lists. They are based on current conditions and, therefore, subject to CHANGE WITHOUT NOTICE.

It is intended that orders placed at prices in this List shall consist of not less than five (5) plants of a class, as five Roses, five Oleanders, five Pecans, etc., regardless of varieties ordered to make up that five.

5 will be furnished at the 10 rate  
50 will be furnished at the 100 rate

**PACKING CHARGES:** No charge will be made for packing small potted and bare-rooted stock or bulk carlot and truckload shipments. Packing will be charged (per schedule on page 45) on tubbed specimens, balled and burlapped plants, and large bare-rooted plants.

**TERMS:** Cash in full with order or satisfactory references are required of those not having established credit with us. To those of established credit, 2% ten days or net 30 days. This 2% discount applies only on nursery stock orders. Peat is net.

**RESERVE ORDERS:** Reserve orders are accepted upon the condition that they shall be void should injury befall the stock before shipment from any cause not under our control. Stock held in our fields on reserve long enough to grow to larger grade will be billed accordingly at shipping time.

**On reserve orders for stock to be shipped at intervals or more than thirty days later, we require 25% advance payment. If booked and not reserved by cash payments, we are not responsible for any variety or size being on hand when stock is ordered shipped.**

**GUARANTEE:** We guarantee our stock to be well grown, true to name, properly packed and shipped according to instructions. In no case shall our liability be more than the original invoice value. There shall be no nursery stock sold under a guarantee to live, except with the understanding that, if it dies, it will be replaced *as soon as possible*, at not less than 50% of purchase price. **Claims for replacement must be made in writing within thirty days after receipt of plants.**

**CLAIMS:** If by any possibility an error or omission should be made, or some item should be found damaged upon unpacking, **notify us within ten days after arrival** of goods, or make *immediate* claim for damage to the transportation company if circumstances warrant it.

**SHIPPING INSTRUCTIONS:** We ask our patrons to furnish complete shipping instructions with each order, as to both destination and mode of shipment. Otherwise, our best judgment will be used.

**DELIVERY BY OUR TRUCKS** will be at the rate of 25c per mile one way. Our three big trucks are always on hand to help with delivery problems if necessary.

**SPLIT LOADS.** It is often possible for us to deliver several orders on one load, the delivery cost being pro-rated on a percentage of total basis.
